List of Contents

NUMBER 1

i Softstrip® data strip containing the table of contents for this issue

R. C. Rocha-Filho — 1 An algorithm to determine the electrical double-layer parameters for the simultaneous adsorption of two anions at the mercury electrode–solution interface

L. S. Cornish, Y. P. Ma, S. C. Chan, T. T. Wong, C. F. Ng and **C. K. Chan** — 7 Signal averaging computer system for Perkin–Elmer 577 infrared spectrophotometer

T. Ryhänen, F. J. Bermejo, J. Santoro and **M. Rico** — 13 MOLTW: a program for conformational studies using potential functions—II. Algorithms for molecular coordinates and topology manipulation

M. Uchida — 19 MPEC2: a code for multi-phase chemical equilibria

M. Carlier, P. Devolder, J. F. Pauwels and **L.-R. Sochet** — 25 A microcomputer-based data acquisition and analysis system. Application to EPR

K. J. Kopecky and **M. Randić** — 29 Computer generation of generalized Wheland polynomials

J. Benz, J. Polster, R. Bär and **G. Gauglitz** — 41 Program system SIDYS: simulation and parameter identification of dynamic systems

P. A. D. de Maine and **M. M. de Maine** — 49 Automatic deductive systems—I. Chemical reaction models

M. Bersohn — 67 A matrix method for partitioning the atoms of a molecule into equivalence classes

W. R. Browett and **M. J. Stillman** — 73 Computer-aided chemistry—II. A spectral database management program for use with microcomputers

Book Reviews

D. F. De Tar — 83 Chemometrics by Muhammad A. Sharaf, Deborah L. Illman and Bruce R. Kowalski

J. C. Telotte — 83 Computer Aided Chemical Thermodynamics of Gases and Liquids by Paul Benedek and Ferenc Olti

NUMBER 2

i Softstrip® data strip containing the table of contents for this issue

G. M. Ostrovskii, A. G. Zyskin and **Yu. S. Snagovskii** — 85 — A system for automation of kinetic computations

W. F. Tong, C. M. Y. Lee, C. P. Luk, F. Lam and **R. S. Tse** — 97 — Microcomputer-assisted surface area determination

F. Ugozzoli — 109 — ABSORB: a computer program for correcting observed structure factors from absorption effects in crystal structure analysis

M. Bader — 121 — A comparative study of new truncation error estimates and intrinsic accuracies of some higher order Runge–Kutta algorithms

M. A. Raso, J. Tortajada, D. Escolar and **F. Accion** — 125 — A general fitting program for resolution of complex profiles

P. L. Mills — 137 — Numerical inversion of *z*-transforms with application to polymerization kinetics

NUMBER 3

i — Softstrip® data strip containing the table of contents for this issue

A. Mendiboure and **C. Delmas** — 153 — Data processing system for the management of experiments on electrochemical generators

Dan Lerner, Philippe Pingand, Christian Federighi, Claude Maudelonde and **Pascal Meriaux** — 159 — An expert-system for the computer-assisted selection of bacterial strains for bioconversions

J. Aubard, P. Levoir, A. Denis and **P. Claverie** — 163 — Direct analysis of chemical relaxation signals by a method based on the combination of Laplace transform and Padé approximants

F. G. Lether and **P. R. Wenston** — 179 — An algorithm for the numerical evaluation of the reversible Randles–Sevcik function

Fernando J. Vega-Catalan — 185 — A nonlinear curve fitting program for functions with separable parameters

Jaroslaw Kostrowicki and **Adam Liwo** — 195 — A general method for the determination of the stoichiometry of unknown species in multicomponent systems from physicochemical measurements

Application

Karen Wiechelman and **Roberto Brunel** — 211 — A microcomputer based system for the collection and processing of multidimensional fluorescence data

Notes

Paul Marshall 219 A method for analyzing exponential decays

J. Palm and **A. P. Sundin** 223 A faster SPACFIL

Book Reviews

Delos F. DeTar 227 Modern Approaches to Chemical Reaction Searching, Proceedings of a Conference organized by the Chemical Structure Association of the University of York, England, 8–11 July 1985. Edited by Peter Willet

Delos F. DeTar 227 Computer Aids to Chemistry. Edited by G. Vernin and M. Chanon

Delos F. DeTar 228 Computer-Assisted Structure Elucidation by Neil A. B. Gray

DeLos F. DeTar 228 Computer-Supported Spectroscopic Databases. Edited by J. Zupan

Software Review

T. A. Cross 229 Molecules (Molecular Modeling) by E. M. Bellot

NUMBER 4

i Softstrip® data strip containing the table of contents for this issue

Zdeněk Slanina 231 An algorithm for evaluation of the exact partition function of free internal rotation and other quantal systems having quadratically dependent energy levels

Marc A. Tischler and **Edward A. Fox** 235 An expert system for selecting liquid chromatographic separation methods

W. R. Browett and **M. J. Stillman** 241 Computer aided chemistry—III. Spectral envelope deconvolution based on a Simplex optimization procedure

Roswitha T. Haas and **Kevin C. O'Kane** 251 Typesetting chemical structure formulas with the text formatter TeX/LaTeX

F. J. Weigert 273 A Gear Iterator

Jon L. Bentley, **Lynn W. Jelinski** and **Brian W. Kernighan** 281 CHEM—a program for phototypesetting chemical structure diagrams

Masao Masamura 299 A simple algorithm for determining total electronic energy by the Extended Hückel Molecular Orbital Method

Note

Marvin Bishop, Sharon Frinks and **AnnMarie M. Meier** — 301 Further modifications to program Spacefil to produce three-dimensional color molecular graphics

Book Reviews

Edwin F. Hilinski — 305 Mathematical and Computational Concepts in Chemistry. Edited by Nenad Trinajstić

DeLos F. DeTar — 305 Computer Software Applications in Chemistry, by Peter C. Jurs

DeLos F. DeTar — 306 Spatial Structure and the Microcomputer, by A. N. Barrett and A. L. Mackay

DeLos F. DeTar — 306 Introduction to Computer-Assisted Experimentation, by Kenneth L. Ratzlaff
